#### **Community Isolation, Community of Coleville, Mono County**

On 09/07/17 at 1728 hours, the Cal OES 9-1-1 Branch notified the California State Warning Center (CSWC) of a Community Isolation in Coleville, Mono County, due to a fiber cable burned by wildfires. The isolation is affecting landline 9-1-1 services only. The Public Safety Answering Point (PSAP) is operational. California Unified Emergency Association (CUEA) and the Cal OES 9-1-1 Branch have confirmed cellular 9-1-1 services are not affected and the population affected is approximately 308 customers.

- The Cal OES Fire Duty Officer (FDO) and Law Duty Officer (LDO) have confirmed that Mono County and Coleville residents are safe and that the fire is moving away from Coleville into Nevada.
- Per the Cal OES Southern Duty Officer (SDO), Mono County has made no request for state assistance at this time.
- At 2148 hours, Cal OES 9-1-1 Branch advised that damage to the fiber, copper and poles in Coleville is more severe than anticipated.
- Wildfires have burned through copper, telephone poles, and approximately 16,000 ft. of fiber in the Coleville area
- Technicians will continue to work through the weekend with an estimated restoral timeframe of 09/11/17.
- If the status of either landline or cellular service should change, Cal OES 9-1-1 Branch will be notified immediately.
- The CSWC made notifications per SOP.
- Cal OES Duty Officers have been advised and will continue to monitor the situation.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- There is a chance for thunderstorms across the interior areas as an upper level low moves up from the south. The best chance for storms is on Tuesday, but there is also a slight chance on Monday and Wednesday, Afternoon thunderstorms will be possible across the Sierra north to Lassen Park this weekend. The primary threats will be frequent lightning and heavy downpours
- A low pressure system just off the California coast will provide western Nevada and the eastern Sierra with the right ingredients for thunderstorm development on Monday through Wednesday mainly in the afternoon/evening hours with the strongest storms on Tuesday. The main threats with these storms include lightning, strong outflow winds, brief heavy rainfall, and small hail. On Thursday, westerly winds will increase as a cold front makes its way through the region. After a few leftover showers on Thursday afternoon due to the front, drier air will work its way through bringing along with it cooler temperatures and breezier conditions. These cooler temperatures should stick around for the weekend with valleys dipping down into the 40s to low 50s and near freezing for higher elevations.
- A weather system off the Southern California coast will bring moist air northward this week. Showers and thunderstorms (along with cooler temperatures) will be possible across much of Northern California Monday through Wednesday.
- Southeast wind flow in between a ridge of high pressure and a coastal low off the CA coast will bring monsoon moisture into central CA. This will provide the ingredients and favorable conditions for showers and thunderstorms to develop this weekend. Sunday afternoon and Monday look to be the best chances for showers and thunderstorms mainly Fresno county southward.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

Rather moist weather anticipated the first half of this week

Higher pressure with warmer, drier conditions will be over the North Ops region today into Monday. Some afternoon cumulus buildups are expected over the mountains, but any chance of an afternoon or evening thunderstorm will just be near Tahoe. There will be some light to moderate NE to E winds in some areas tonight into early Monday with relatively poor to moderate RH recovery. Afternoon highs today and Monday will be about 10 degrees above normal with the warmest inland areas around 100.

A low off the southern California coast will move north Monday and bring isolated afternoon and evening showers or wet thunderstorms back to the region later in the day and overnight. Showers and isolated wet thunderstorms associated with that low will continue Tuesday through well into Wednesday night and could occur anywhere in the Geographic Area. Thursday a low pressure trough will move into the region from the NW off the Pacific. There will continue to be a chance of lingering showers or isolated thunderstorms over the eastern mountains Thursday, but next Friday and Saturday look dry in all areas. Temperatures will cool to more seasonable values midweek onward with the warmest inland valleys in the mid 80s to lower 90s. Some gusty south to west winds are expected to develop later this week as that stronger trough moves into the region.

## **SOUTHERN CALIFORNIA**

Scattered showers and thunderstorms through Wednesday

An area of low pressure currently off the Southern California Coast will bring scattered showers and thunderstorms to the region this afternoon through Wednesday afternoon. Most locations will receive between 0.10 and 0.50 inch of rainfall through the middle of this week, but some mountain and desert locations will receive an additional 1 to 2 inches of rainfall. There will be little change in the near normal temperatures through Tuesday, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. Temperatures will cool to 5 to 10 degrees below normal Wednesday through the end of this week as the low pressure off the California Coast moves inland and a Pacific trough follows. Minimum humidity will be above 20% across the region through the end of this week. There will be gusty westerly winds during the afternoons and evenings across the wind prone mountain and desert areas Wednesday through the end of this week.
